

COMPLEX PETROL SYSTEM CLEANER

ADVANCED MULTIFUNCTIONAL PETROL FUEL ADDITIVE

DESCRIPTION

Advanced multifunctional petrol fuel additive. Improves fuel injection & general performance of petrol engines and exhaust treatment systems.

BASIC BENEFITS

- Increased power and dynamics of the engine.
- Smoother engine running.
- Improved engine reliability.
- Fuel savings.
- Reduction of CO2 levels.

PROPERTIES

- Actively cleans and lubricates injectors, valves and fuel systems.
- Protects the fuel system from corrosion.
- Protects the fuel from oxidation and degradation.
- Removes and neutralises water from the fuel.
- Prevents clogging and compromising of the catalytic convertors.

APPLICATION

Use for both preventive and problem-solving treatment.

Suitable for all Petrol engines including the latest generation high pressure directly injected (GDI, FSI & SIDI).

Can be used as concentrate in fuel injection cleaning systems. E10 fuel compatible.

Recommendations

For maximum performance afterwards also full engine clean up could be completed by treating the Air intake & EGR system, valves and combustion chambers with the Intake Pro Spray.

For further maintenance of the improved condition is recommended the Petrol Multi Conditioner fuel additive for every day use.

DIRECTIONS FOR USE

Add one can to fuel before filling. Mix 300 ml with a maximum of 70 litres of fuel.

TYPICALS

Physical state:	Liquid
Colour:	Amber
Boiling point (°C):	180
Flash Point (°C):	60
Ignition temp (°C):	200
Pour point (°C):	-40
Density @ 20°C:	0,885

PACKAGING

300 ml can (12 x 300 ml carton)
